

LU600 HEVC

## FOR THE ULTIMATE VIDEO PERFORMANCE IN LIVE STREAMING

The LU600 is LiveU's sixth-generation portable unit for global newsgathering, live sports and events coverage. Setting the standard again for IP bonding, the LU600 delivers the highest video quality and bitrate in the market, fastest file transfer and lowest delay. This is offered over a new streamlined user interface, with an ultra-responsive 5.0" capacitive touchscreen.

Combined with the 4K HEVC Pro Card, the LU600 allows professional broadcasters and content creators to benefit from unparalleled video performance with extreme bandwidth efficiency – using one of the smallest portable cellular bonding units in the market. Broadcasters can provide the same video quality as H.264 while using about half the bandwidth. In cases where original H.264 bitrate is maintained, the HEVC Pro Card offers greatly improved video quality.

LiveU's LU600 HEVC product suite offers three configurations to meet customers' specific production needs, including: HD, 4K-HDMI and 4K-SDI. The 4K HEVC solution enables VR and 360 degree applications.
